

Trent Limited – Sustainability Policy

(Approved by the Board of Directors on 11th August 2022)

Our Philosophy

At Trent, we are conscious of our responsibility towards environment, social and ethical standards. With these principles at core, we strive to elevate stakeholder experience across value chain through a long-term business strategy integration.

We at Trent ensure that:

- Sustainability is given due consideration in all strategy formulations and embedded in business. This includes societal, environmental and governance practices
- We positively impact our stakeholders through our products and services without causing harm to health, keeping their safety in mind and enhancing experience throughout product lifecycles.
- Clean, safe and healthy work conditions are provided for all people working in or on behalf of Trent
- Clean and energy efficient processes are being adopted in our operations, keeping customer expectation and experience in mind
- We promote “reduce, reuse and recycle” practices with transparency and traceability across the value chain
- We work with the communities and contribute towards making a difference in the quality of their life

Trent will ensure highest levels of transparency in all its engagements with the stakeholders while living to this philosophy.

Trent will also consistently track, monitor, report in line with global / national reporting frameworks.
